

GM POLYPLAST LIMITED

ABOUT THE COMPANY

OUR COMPANY IN 2003

- GM Polyplast started with manufacturing of HIPS and ABS Sheets
- Back in 2003 the company had limited production capacity and most of the task were carried out manually.
- Initially GM Polyplast had sales in limited parts of India with no presence in the international market.
- A few years later GM Polyplast did a backward integration by starting the in-house production of Premium Quality Granules.

GM POLYPLAST IN 2022

- Currently, GM Polyplast imports scrap of both premium and inferior quality, which is subsequently turned into sheets and granules of premium quality. The company is concentrating on establishing relationships with importers and exporters around the globe.
- GM Polyplast has diversified its product Range by adding new PET Sheet line
- Apart from this the company is developing its existing product by bringing in new colours and textured design in plastic sheet.
- Due to Covid-19, the entire world paused, but now that things have returned to normal, we are back to participating in Exhibitions. We will be participating in Plast India, one of the biggest plastic events in India, from February 1st to 5th in 2023 Delhi, and Plastivision from December 7th to the 11th in 2023 Mumbai.

QUANTITY

GM Polyplast has more than 10 high capacity machines which is used in the manufacturing of Sheets and Granules to fulfil the quantity demanded by the customers.

PRICE

We believe that every customer is precious and in a competitive market every customer has a budget they cannot exceed. That is why we provide the best price possible and make sure high quality standards are maintained.

QUALITY

GM Polyplast holds ISO 9001:2015 Quality Management System and ISO 22000:2018 Food Safety Management System certificates, proving that the company maintains product quality and double-checks orders.

Market Position

GM Polyplast's average annual growth rate is 27.26% (2006-2021). By adapting to the change in business environment, the company was capable of maintaining its position in the market.

RELATIONSHIP

GM Polyplast believes in maintaining very close relation with all of our customers, which has aid us to become one of the largest companies in our segment of the market

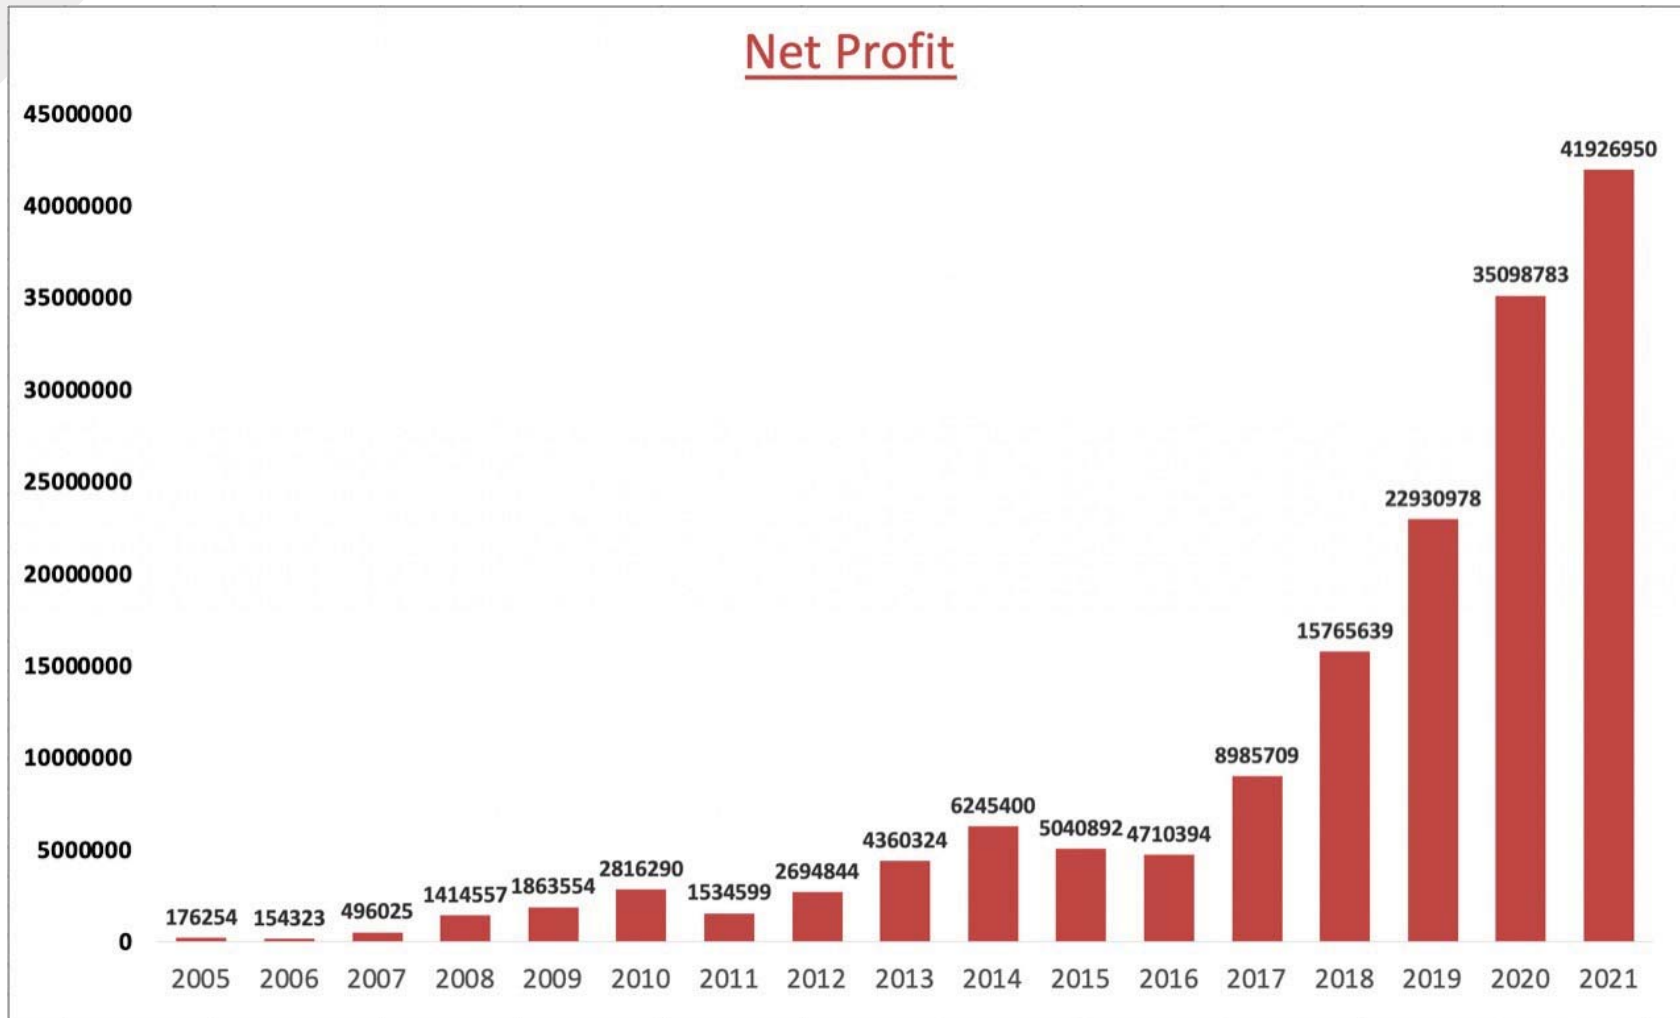

FUTURE TARGETS

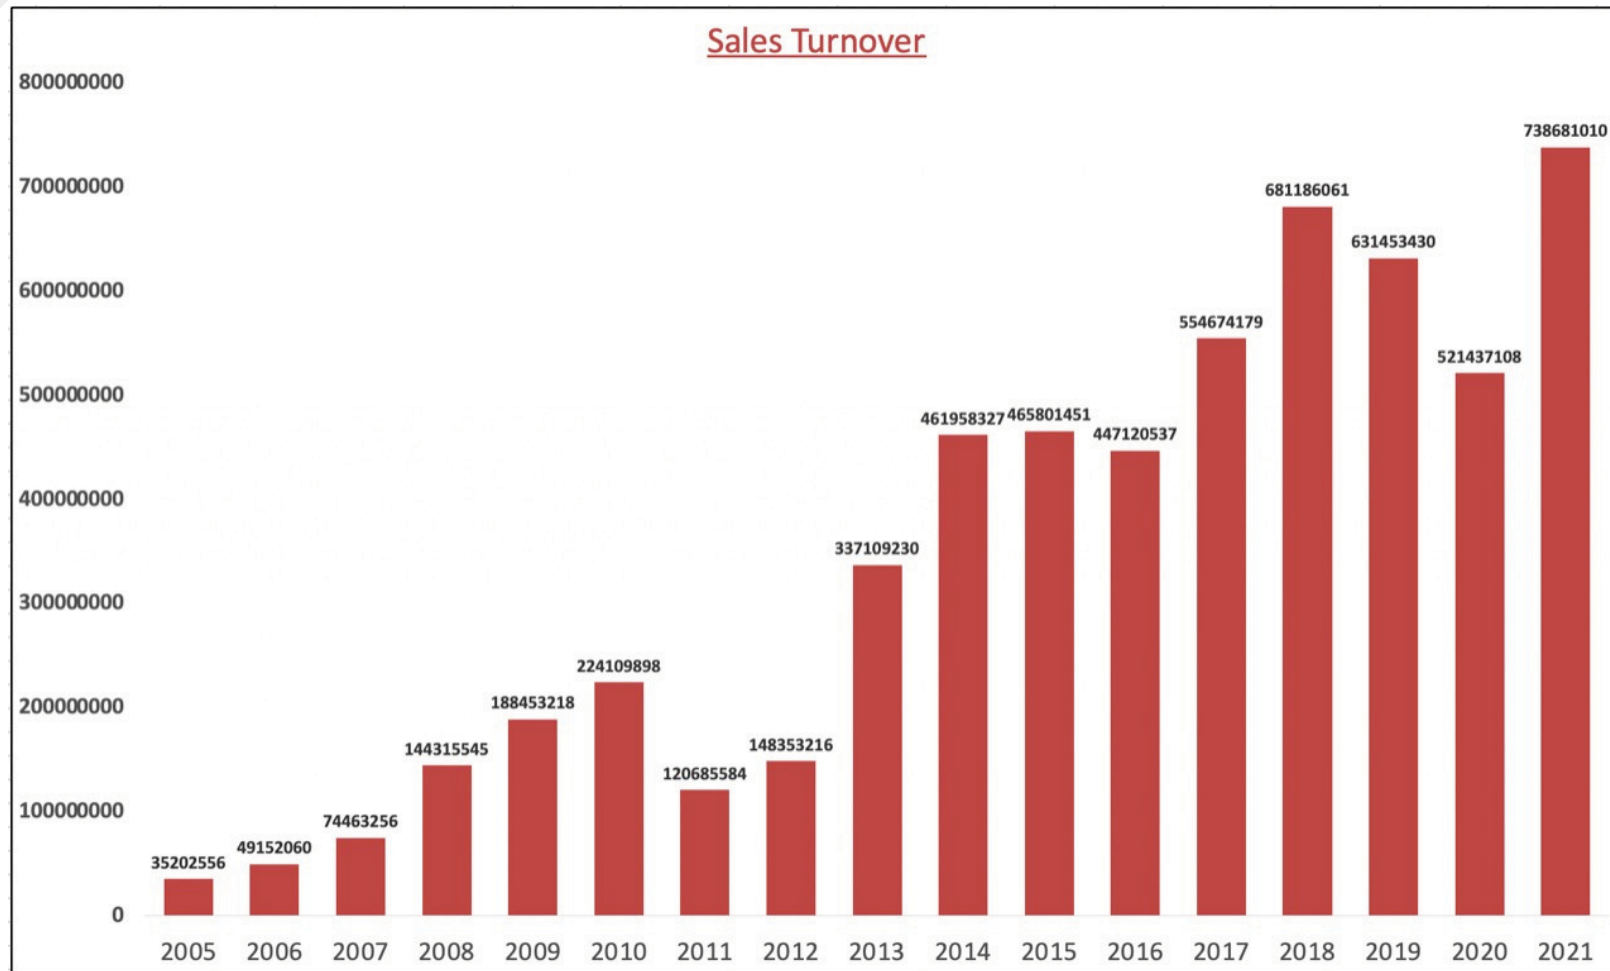

- Plastic is most recycled material globally and has a huge potential for growth. We will be using market penetration strategy by targeting to new industries which has not been tapped by the company yet.
- In the short-run we are looking forward to massively increase our export sale and create a brand image in the international market by participating in exhibitions abroad and create a client base in new markets
- GM Polyplast is planning to bring in new technology of automated machines which will be less labour intensive and this will help to increase productivity and efficiency and most importantly the quality of the products
- Sustainability is the future, we are focusing to make premium quality recycled Sheets and Granules by clearing plastic scrap. GM Polyplast is currently purchasing PET Bottle flakes which has contributed to recycling 100,000,000 bottles of 1 liters every year.
